# Bulk User Management

Streamline User Management at Scale –
Automate, Control, and Optimize.

Our Bulk User Management feature automates user and license management, allowing bulk activation, deletion, and deactivation of inactive users. It also includes CSV export with advanced filters for improved flexibility, reporting, and efficiency.
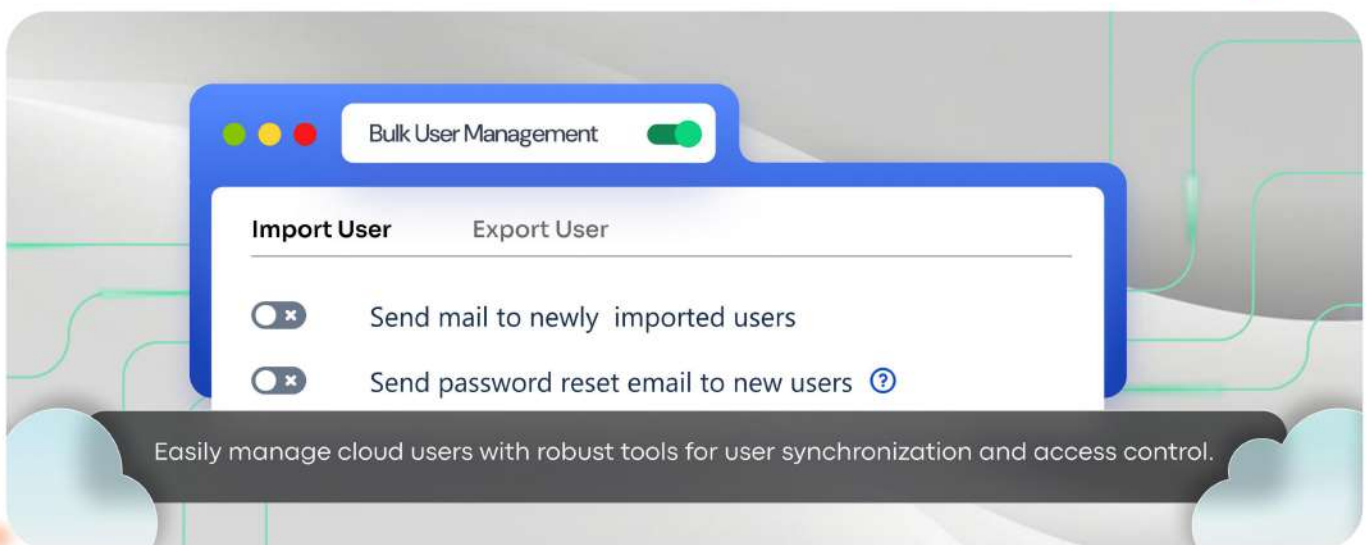

## Our App Offers:

🛡 **Auto-Activation and Deactivation:** keep your licensed user count under control by automatically activating new users and deactivating inactive users.

🛡 **Advanced Search Filters:** Quickly find users using advanced search parameters such as groups, directories, last login dates, etc.

🛡 **Import/Export:** Easily export user lists and update them via CSV import, keeping user data up-to-date with minimal effort.

🛡 **Bulk Operations:** Perform bulk actions like creating, deleting, or assigning/ removing users from groups with just one click.

🛡 **Customizable Email Notifications:** Set up personalized email notifications to keep users informed of account changes.

🛡 **Scheduled Tasks for Group Management:** Automate group management tasks, ensuring timely updates and consistency.

🛡 **Revoke Access:** Instantly revoke access for users who no longer need it, maintaining security and compliance across your system.
