

JENKINS SINGLE SIGN-ON (SSO)

Boost Security, Simplify Access with Single Sign-On (SSO)

Enhance your Jenkins experience with our Single Sign-On (SSO) solution, designed to simplify authentication for development teams utilizing CI/CD pipelines. Our SSO solution boosts security and streamlines user access, allowing your team to focus on delivering quality software faster.

Our App Offers:

- ✔ **Multi-Protocol Support:** Flexible integration with all SAML IDPs.
- ✔ **Wide Range of Identity Providers:** Connect seamlessly with Azure AD, Google Workspace, Okta, and more.
- ✔ **Customizable Login Experience:** Personalize the login page to reflect your organization's branding.
- ✔ **Role-Based Access Control:** Simplify access management by assigning Jenkins roles based on user attributes.
- ✔ **Robust Session Management:** Control session durations and enforce re-authentication for enhanced security.
- ✔ **Jenkins Crowd Integration:** We also provide a provision to integrate the Atlassian crowd with Jenkins using our SAML plugin.

JENKINS (2FA/MFA)

Strengthen Your Security Beyond Passwords

Enhance the security of your Jenkins environment with our Two-Factor Authentication (2FA) solution. Designed to protect your CI/CD pipelines from unauthorized access, our 2FA system employs advanced authentication methods and adaptive security features to ensure that only verified users can interact with your critical development infrastructure.

Our App Offers:

- ✓ **Diverse Authentication Methods:** Choose from Google Authenticator, Microsoft Authenticator, Authy, and SMS.
- ✓ **Adaptive Authentication:** Adjust security based on user behavior and location for enhanced protection.
- ✓ **Conditional Access Policies:** Enforce MFA based on user roles, IP addresses, or specific times.
- ✓ **User Self-Service Portal:** Enable users to manage their 2FA settings independently.
- ✓ **MFA on Builds:** Secure Jenkins automation tasks like building, testing, and deployment by enforcing an added layer of security.

ABOUT US

Security Experts Trusted by 25,000+ Organizations Worldwide

miniOrange stands at the forefront of Atlassian security, delivering Single Sign-On (SSO), Multi-Factor Authentication (MFA), and User Management solutions. Be it Data Center or Cloud, our apps secure Atlassian with seamless SAML and OAuth integration for ease of use and top-tier security.
